LVT regression were a non-ischemic cardiomyopathy with a baseline thrombus.

**Diagram:***

- LVT regression
- Thrombus
- Platelet therapy
- (c3)

**Adjusted Hazard Ratio (95% CI):***

- LVT regression: 2.74 [1.43-5.26]
- Thrombus: 0.66 [0.45-0.96]
- Platelet therapy: 1.18 [0.61-2.28]
- (c3): 0.49 [0.22-1.08]

**X-axis:** More frequent total LVT regression
